

LOMPOC POLICE DEPARTMENT COMMUNITY NOTIFICATION SYSTEM

ALTERNATE TELEPHONE CONTACT FORM

The Lompoc Police Department has established a telephonic notification system designed to inform residents of emergent events impacting their neighborhoods. This system uses the public telephone database and can be customized to isolate only those areas affected by an emergency. We recognize that many of our residents work outside of their home and would not be notified of emergencies in their neighborhood via their home phone if the event occurred during their working hours. In recognition of this, the Lompoc Police Department is offering the opportunity for residents to include their cellular telephone numbers in the community notification database. If you decide to include your cellular number in the Community Notification System database, you will receive a message via your cellular telephone and at your home phone.

NAME _____

ADDRESS _____

HOME TELEPHONE NUMBER _____

CELLULAR NUMBERS TO BE ADDED TO THE DATA BASE

Given the fact that no system is perfect, completion of this form does not guarantee that you will receive notification in the event of an emergency. The Lompoc Police Department's community notification system is merely another tool to enhance preparedness and facilitate public communication during emergent events. When you receive a message from the community notification system it is important that you follow the instructions provided and avoid calling 9-1-1 or the communications center unnecessarily.

It is your responsibility to notify the Lompoc Police Department when you change your cellular telephone number, or cancel or change your cellular service.

My signature authorizes the Lompoc Police Department to add the cellular telephone numbers provided above to the Lompoc Police Department Community Notification System.
